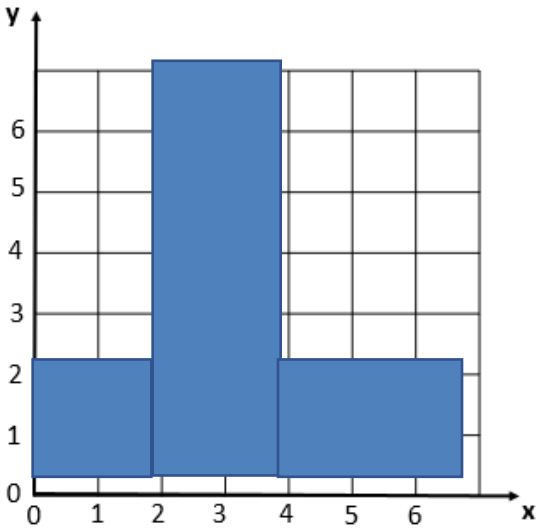
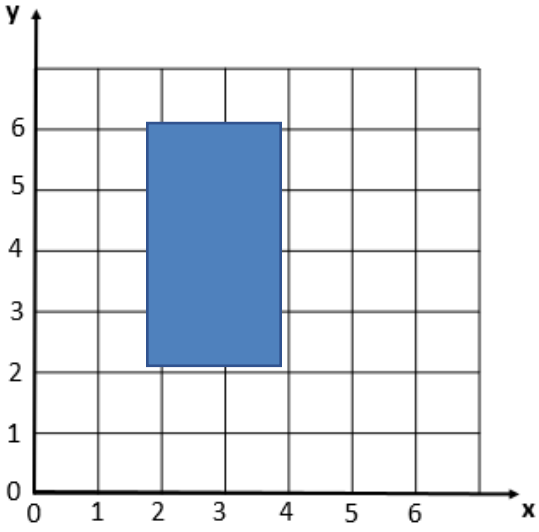
HOMEWORK

1. Draw the shape corresponding to the Boolean expression

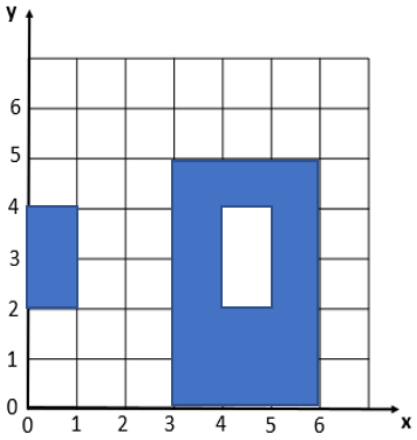
a, `(x > 2 and x < 4) or (y < 2)`



`b, (x>2 and x<6) and (y>2 and y<6) and not(x>4)`



2， Write the boolean condition for this grid



Expression:

(x>0 and x<1) and (y>2 and y<4) or
(x>3 and x<6) and (y>0 and y<5) and

Not[(x>4 and x<5) and (y>2 and y<4)]

2. Demonstrate these equalities using the 9 simplification rules you have learnt:

- !(C and D) and (!C or D) and (C or !D) = !C

  !(C and D) and (!C or D) and (C or !D) = !C or !D and (!C or D) and (C or !D)
  = (!C or !D) and (!C or D) and (C or !D)
  = !C or (!D and D) and (C or !D)
  = !C or False and (C or !D)
  = !C or (False and C) or (False and !D)
  = !C or False or False
  = !C

- ! (!C and (!B or !C)) = C

  =!(C and (!B or !C))

=!((!B and C) or (!C and C))

=!(B or C)

=!(B)

=C

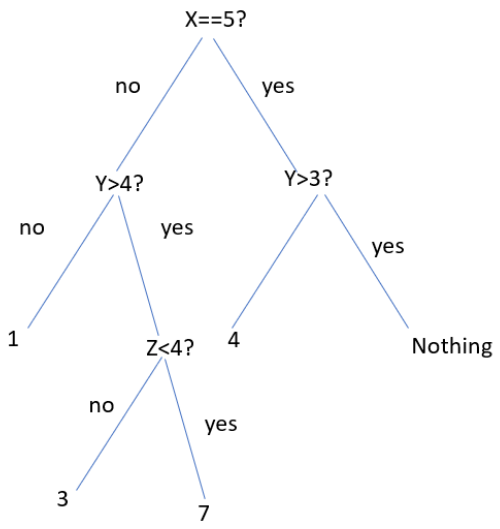
- (A and B) or (A and !B) = A

=A and (B or !B)

=A and A

=A

3.. What is the output of flowchart? If x=6 and y = 5 and z = 4



4. Draw the tree of conditions

CELL CONTENTS EXACTLY	POINTS
●	10

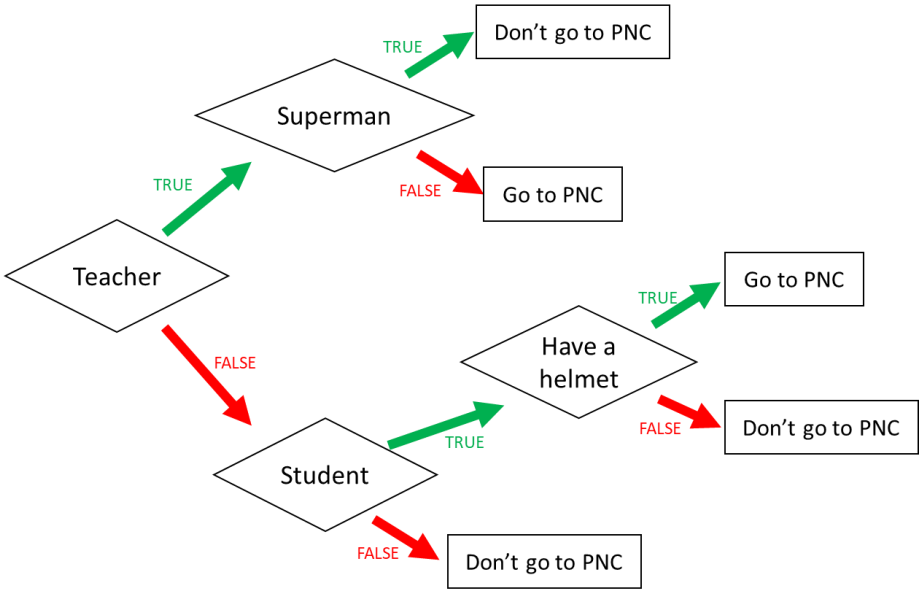
7.



Superman
TRUE
Don't go to PNC
FALSE
Go to PNC
Teacher
TRUE
FALSE
Have a helmet
TRUE
Go to PNC
FALSE
Don't go to PNC
Student
TRUE
FALSE
Don't go to PNC

1. I am a teacher and I am superman, can I go to PNC?

I don't go to PNC.

2. I am not a teacher and not a student, can I go to PNC?

I don't go to PNC.

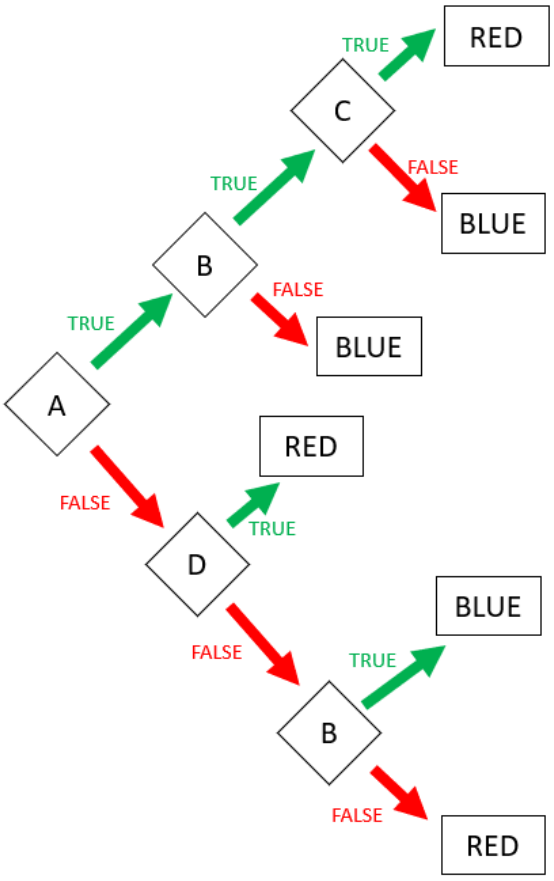
3. When can I go to PNC? (Express the condition using a Boolean expression)

I go to PNC if:

Teacher and not superman, I go to PNC.

Not teacher and superman and Hace a helmet, I go to PNC.

8



Expression: **RED** = ..(ABC) OR (!AD) OR (!A!D!B)……

Expression: **BLUE** (FALSE) = …(AB!C) OR (A!B) ……

9. Encoding

- First 3 characters “MIX”, repeated many times (max repetition is 5)
- Then 1 character “!”, repeated many times (max repetition is 5)
- Then 1 number (0-3)

Examples:

MIXMIXMIX!1

MIX!!!!!3

MIXMIXMIX!!!2

Q1. Propose an **encoding structure** to encode this image.

Encoding parts	Encoding values (in binary)
The repetition of text “MIX”: 1…5	001…101
The repetition of character “!”: 1…5	001…101
The number of the end: 0..3	00…11

Q2. What is the total **size** of your encoding? Give explanations.

Encoding size:8bits

Explanation:

Part1: 101 that mean text of MIX repeated 5 times

Part2: 101 that mean character if ! reqpeated 5 times
Part3: 11 that mean the number at the end is 3.

We want to encode **a text** following those rules:

- ✓ 3 letters: A, B, C
- ✓ The letters are always in the alphabetic order
- ✓ Letters are repeated from 1 to 10 times
  - Each letter is repeated the same number of times
- ✓ The last character must be either: X, Y, or Z

Examples:

ABCZ	Good
AAAABBBBCCCCX	Good
AABBCCY	Good
AAABBBCCCX	Good
AABBBBCCX	Bad: letter A is repeated 2 times but letter B 3 times

Q1. Propose an **encoding structure** to encode this image. (20pts)

Encoding parts	Encoding values (in binary)
POSITION "A,B,C" : 3 A=1 B=2 C=3	01 10 11
The repetition of REATED : 1...10	0001....1010
The repetition of either and letters : X,Y, or Z X=0 Y=1 Z=2	 00 01 10

Q2. What is the total **size** of your encoding? Give explanations.

Encoding size:(4pts)

8 bits

Explanation:(6pts)

Part1 : 11 that mean text of "ABC " repeated 3 times

Part2 : 1010 that mean text of " 1..10 "repeated 10 times

Part3 : 10 that mean text of " XYZ " repeated 3 times
